PRODUCT SETUP

WHAT IS BLEED?

When designing for print it is important to remember that it can be difficult to tim a job right on the edge of a design. In order to achieve it best result possible, you will need to extend your design past the trim lines, so the design can easily be cut down to size. The area that extends past your trim lines is called 'bleed'. In order to get the best results when designing for print, it's important to ensure your artwork always extends past the trim lines.

BUSINESS CARD

90v55mm

GENERIC FACTS:
